PROFILE

Dedicated and passionate Front-End developer with a strong foundation in HTML, CSS, and JavaScript. Skilled in creating responsive and user-friendly web interfaces. A fast learner with a keen eye for design and a drive to stay updated with the latest web development trends and technologies. Committed to delivering high-quality code and collaborating effectively with cross-functional teams to create exceptional user experiences and bringing imaginative idea to life.

WORK EXPERIENCE

Purchase/Billing Engineer 2021-2023

Finetec Glazing Systems

- Managed all payment processing, invoicing and collections tasks.
- Attended team meetings to discuss issues, priorities and outstanding accounts, improving department operations.
- Processed invoice payments and recorded information in account database.
- Tracked and chased unsettled account balances, providing reports and findings to inform management.
- Coordinated workflows and delegated tasks for bill checking, posting and credit note processes.
- Procurement Management: Managing the entire procurement process, including sourcing, selecting suppliers, obtaining quotations, negotiating prices, and issuing purchase orders.
- Vendor Management: Developing and maintaining relationships with suppliers and vendors, evaluating their performance, and ensuring timely delivery of goods and services.

PERSONAL PROJECTS

Personal Portfolio Website

- Created a personal portfolio website to showcase my skills. Designed it with a modern and responsive layout using React. Included sections such as About Me, Projects, Skills, and Contact Information.

React Blog Project

- Developed a dynamic blog website using React and JavaScript. Implemented features like blog post listing, individual blog post pages. Leveraged React hooks for efficient state management and reusable components for code reusability. Integrated RESTful APIs to fetch and display blog content dynamically.

Weather Application

- Created a weather application that fetches and displays weather information based on the user's location or a search query. Used a weather API to retrieve data and display it in a visually appealing and user-friendly manner. Utilised HTML, CSS, and JavaScript

To-Do List Web Application

- Created a dynamic to-do list web application using JavaScript. Implemented essential features such as task creation, deletion, and task completion tracking. Utilised JavaScript's DOM manipulation to provide a responsive and interactive user interface.
